

SmartFix 100% Renewable Energy

Smarter business energy that won't cost the earth...

1. Simple way to reduce your carbon impact with renewable energy
2. Energy sources include solar, wind & hydro, backed by renewable certificates
3. Multiple low-cost product options, prices fixed for up to 5 years
4. Control your cash flow through Budget Plan payment (fixed Direct Debit)
5. Easy manage your account online with our SmartWeb service

Plus... lowering CO2 with tree planting

We will fund the planting of 10 native trees when you switch to SmartestEnergy Business, helping to support real global climate action.

Taking the 'smartest' journey

There is no greater global cause than climate change and as part of the UK business community, you can make a real contribution to reducing carbon emissions. Switching your energy supply to a renewable product is one of the smartest choices your business will make. Here's how it works...

1. Commit

Decide which product suits your business commitment to **reducing carbon emissions**

2. Source

We purchase your energy and match your consumption using **renewable certificates**

3. Supply

You switch to **SmartestEnergy Business** and start your carbon reduction journey

6. Report

Each year we issue you a **renewable energy label** that shows how much carbon you've saved

5. Invoice

You receive an **accurate invoice** each month, payment is collected by fixed DD

4. Meter

We install a **free smart meter** for accurate billing and automated reads

Choice of product options, SmartFix up to 5 years

As well as committing to a green energy, you'll benefit from fixing your supply prices against wholesale market increases. The longer you fix, the more protection for your business. You can 'SmartFix' your business against rising operating costs for a 1, 2, 3 or 5 year term.

Clean energy backed by renewable certificates

Our products are powered by a blend of renewable generation including natural sources such as wind, solar and hydro. Renewable certificates are a guarantee that the electricity we supply comes from renewable sources. Every unit of electricity purchased is matched by a UK renewable certificate.

Get a free Smart Meter for your business

With accurate billing and automated reads, smart meters can save your business time and money. Plus, you can better understand your usage and give the industry data to manage demand at national level. We install one free within 8 weeks after you switch.

Spread your energy costs with a Budget Plan

Avoid seasonal fluctuations and spread the cost of your electricity over the year with fixed monthly payments. Equal payments are collected once a month, on or around the same day by Direct Debit. Automated reads by your smart meter keep your payment amount accurate.

Our Tree Planting Promise

Helping to lower carbon emissions with Ecologi

When you switch to SmartestEnergy Business, we'll fund the planting of 10 new trees to our global impact forest. By teaming up with award-winning organisation Ecologi, we are taking positive climate action whilst empowering our customers to reduce their carbon emissions.

By supporting the planting of native and diverse trees in global locations including Madagascar, Mozambique, Kenya and Nicaragua, our tree-planting partners work closely with local communities, providing employment and encouraging sustainable practices. We are committed to a creating a better eco-system for all and genuinely believe that together, we can make a difference.

Dedicated Customer Services
