

Non-Commodity Costs 5 Key Takeaways

Bill Breakdown

TNUoS Changes Under The TCR

- > New charging method splits end users into 4 bands based on size
- > Ofgem changes delayed until April 2022
- > End users still able to Triad manage for winters 2020/21 and 2021/22

Renewables Obligation

- > **£105m shortfall**
Suppliers unable to meet obligations means mutualisation has been triggered for a third consecutive year
- > **Mutualisation**
The final figure to be recovered will be published by Ofgem in early December

BSUoS Charges

- > Industry taskforce recommends changes
- > BSUoS would be paid solely by end consumers
- > Costs would be fixed over 14/15-month periods based on forecasted costs

DUoS Changes Under The TCR

Half-Hourly:

A proportion of costs will move from Red/Amber/Green to a fixed charge in April 2022

- > From April 2021, Non-Half Hourly tariffs will move from the current charging structure, onto a Red, Amber, Green (RAG) structure – similar to what we see on Half-Hourly tariffs
- > However, under Ofgem's new network price controls (beginning 2023) it is expected that DNOs will have a much lower allowed rate of return.
