Total Smartest Energy		121	

The Company certifies the above Listed Carbon Footprints based on the data provided in the following models: **Smartest Energy product emission factor model v1.3 230822**

Level of Assurance

This certification was carried out to a Reasonable Level of Assurance.

Materiality

It has been verified that all material non-conformities identified during the sampling performed on the footprint models submitted have been closed. If at any time and for whatever reason You or the Company identify any further non-conformities, the terms described in the Description of Service and General Terms and Conditions will apply. It is also Your duty to promptly inform the Company in writing.

Provision for material discrepancy

The Company has performed the certification in accordance with the applicable material discrepancy threshold: Where individual or the aggregate of actual errors, omissions or misrepresentations affect the final footprint result by the equivalent of 5% or more they are predetermined to be a material discrepancy and therefore a non-conformity.

Certification Period

This Certification is valid for a period of 12 months from 01/09/2022 (the “effective date”) until 31/08/2023 subject to the provisions in this Certification Letter.

We will be in touch with you prior to the expiry of this certification to discuss your communication plans as well as re-certification. However, if you have any questions please feel free to get in touch with us.

Suspended Findings

The following findings were raised but considered suitable for action prior to the next surveillance and/or re-certification audit.

Identifier	Requirement	Planned action	Severity
OFI 3.0	Whilst the data was seen to be from the latest version, the source link in the Ofgem tab to the Fuel mix disclosure data table published on the gov.uk website had not been updated to the latest revision but however it automatically linked to the latest version (2019-20). It may be preferable to include a link to the general webpage (https://www.gov.uk/government/publications/fuel-mix-disclosure-data-table) with the date of latest revision rather than the specific link to the latest pdf file.	Carried over from previous recertification. To be actioned prior to the next recertification.	OFI
OFI 4.0	Cell AZ38 of the Calculations tab appears to label the emissions factors displayed as "Emission factor (g CO2/kWh)". The emissions factors are, however, in terms of kg CO2/kWh. This does not impact the actual calculations.	Carried over from previous recertification. To be actioned prior to the next recertification.	OFI

Communications

You are permitted to communicate the certified results as set out below and in any associated Annex:

- 'The Scope 2 Carbon Footprint of this product has been certified by the Carbon Trust'.

Any communications, other than those listed above, shall be submitted to the Company for prior approval and may be documented in an Annex of this Certification Letter at the Company's discretion.
