

SmartestEnergy
Empowering a greener generation

We're empowering switched-on customers, generators and partners to get to net zero. As a growing community, we can make the system fairer and more powerful. We can better show the realities and rewards of switching from fossil fuels to clean energy.

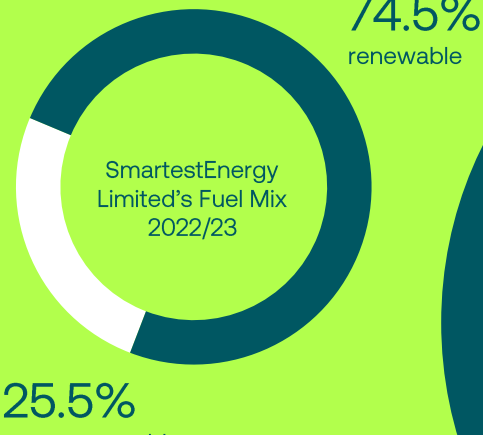

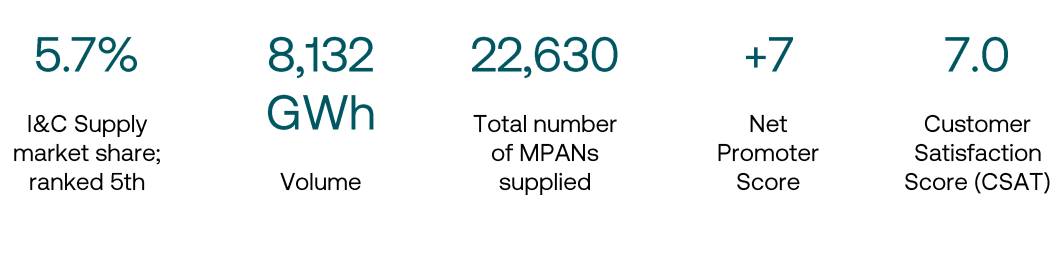

We're helping businesses take advantage of new opportunities in a more complex and distributed energy system. Connecting generators to customer demand. Accelerating the market. Creating jobs. And championing greener energy for generations.

We've been shaping the energy landscape in the UK since 2001 and over the last few years we've opened offices in the United States and Australia. With the financial strength and innovation of our parent company, the Marubeni Corporation, we are a stable and well-resourced independent energy company.

Commercial and Industrial (C&I)

Supplying electricity to large businesses, complex portfolios, the public sector and mid-market in the UK

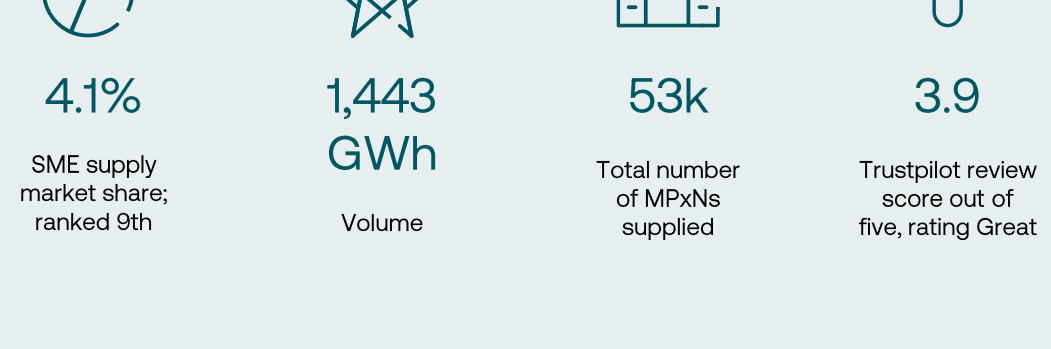

5,160 GWh
Renewable energy volume supplied*

*Based on our annualised volume by green energy source, which currently comprises 43.5% of our electricity supply contracts

Scope 2 emissions: 111 gCO2/kWh
Total radioactive waste: 0.000 g/kWh

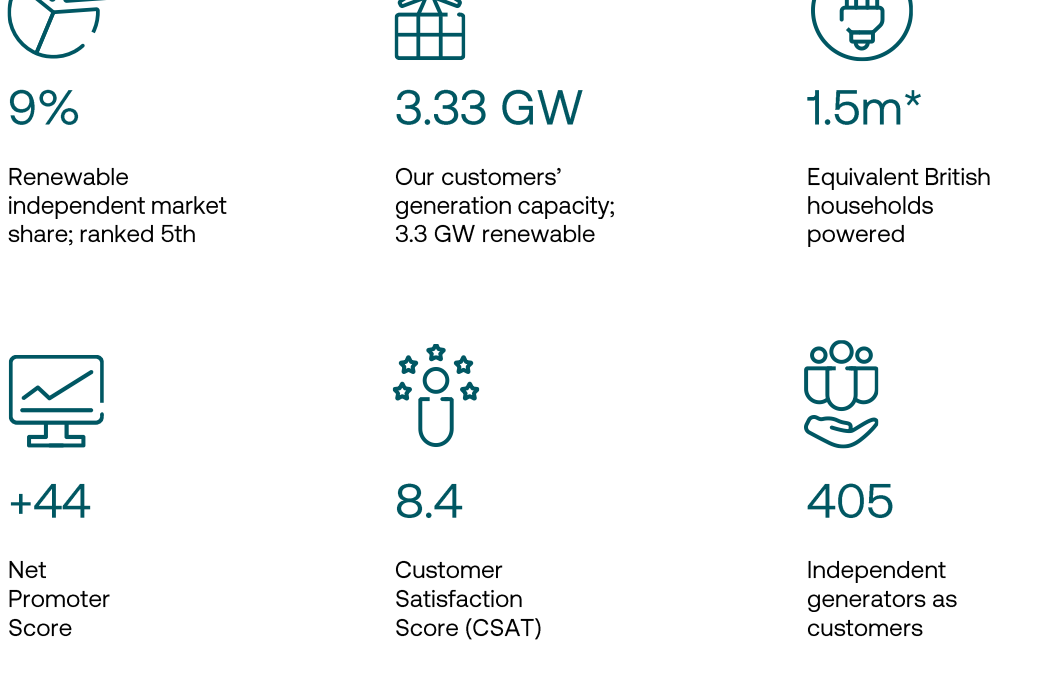

Business

Supplying electricity and gas to small and mid-size businesses in the UK

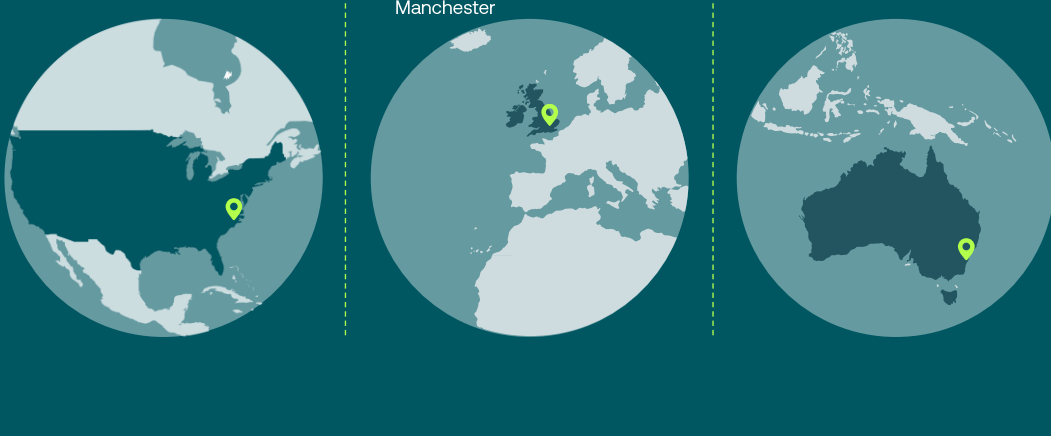

Generation

Providing UK independent generators with a competitive route to market and access to flexibility services

*Based on our expected annual volume, we will be powering a vast number of businesses, which if equated to something we can all relate to – our homes – means we'd be able to power a large number of households!

Our global reach

	<p>2001: SmartestEnergy Limited started its asset-light generation business</p> <p>2008: SmartestEnergy Limited became a registered supplier serving UK businesses</p> <p>December 2019: SmartestEnergy Business Limited (formerly Dual Energy) was acquired; it supplies electricity and gas to businesses</p> <p>July 2021: SmartestEnergy Business Limited launch renewable product</p>
